HIV-1 gp120 Optimer® shows high target affinity for the viral protein by biolayer interferometry.

Target information

Gp120 is a glycoprotein that is part of the outer layer of the HIV-1 virus. The protein presents as a viral membrane spike consisting of three linked gp120 molecules anchored to the membrane by gp41. The surface gp120 subunit is essential for viral infection of host helper T cells, via sequential interaction with CD4 receptor and a co-receptor CCR5 or CXCR4. This induces a conformational change that allows the transmembrane subunit gp41 to mediate fusion between viral and target cell membranes. It has a postulated role in facilitating viral persistence and continuing HIV infection by influencing the T cell immune response to the virus.

Optimer® binders

Optimer® binders are small oligonucleotide ligands (~15kDa) that bind to target molecules with comparable specificity and affinity to that of antibodies. These synthetic affinity ligands are designed to mimic the molecular recognition characteristics of monoclonal antibodies in different applications.

Intended for research use only. Not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.

**The Optimer® advantage**

Optimer® binders are oligonucleotide affinity ligands that offer several key benefits over traditional protein-based affinity reagents.

- Batch consistent manufacture
- Rapid discovery & development
- Animal-free discovery, development & manufacture
- Highly stable with long shelf life
- Security of supply from defined Optimer® sequence
- Small size for improved signal:noise & tissue penetration

---

**Flexible functionalisation for assay compatibility**

Optimer® binders can be modified with a wide variety of functional groups for simple platform integration. Please enquire for more information.

For custom modifications specific for your research, or more details about how Optimer® binders can be utilized in your research, please get in touch via email at info@aptamergroup.com.
